

Faculty Positions in Complex Materials Materials Chemistry and Materials Theory

Michigan State University is continuing an aggressive, broad-based effort to expand its research and educational expertise in complex materials. As a cornerstone of this effort, we are seeking outstanding candidates to fill 2-4 tenure-stream faculty positions. Appointments can be made at any level within the Departments of Chemistry or Physics and Astronomy. Joint positions with one or more of the Departments within the College of Engineering are also possible. Research in all areas of experimental or theoretical materials research will be considered, with preference for candidates whose research agenda contributes to building cross-disciplinary and cross-college collaborations. Michigan State has in place an extensive infrastructure for the fabrication and characterization of materials and an established faculty base in materials chemistry and materials physics. Institutional support for this initiative is strong with ongoing university support for a center of research excellence in complex materials, and further investments in faculty positions, facilities and space are possible upon successful completion of the search.

Inquires regarding Materials Chemistry positions should be addressed to Professor James McCusker in the Chemistry Department (jkm@chemistry.msu.edu). Inquiries concerning Materials Theory positions should be directed to Professor Phillip Duxbury in the Physics and Astronomy Department (duxbury@pa.msu.edu). Applications, including a resume, publication list, a summary of research interests and description of research plans, along with three or more reference letters should be sent to: Complex Materials Search Committee, Department of Chemistry, Michigan State University, East Lansing, MI 48824-2320. Consideration of applications will commence October 1st and will continue until the positions are filled. MSU is an affirmative action, equal opportunity employer. MSU is committed to achieving excellence through cultural diversity. The university actively encourages applications and/or nominations of women, persons of color, veterans and persons with disabilities.
