

To: PHY252 students with Wednesday sections  
From: C. Bromberg, Supervisor of PHY252  
Re: PHY252 Lab Sections, Feb. 2

In light of the University closing on Feb. 2, PHY252 lab sections 19-26 could not meet this week. Within the normal schedule we cannot provide a regular lab meeting for these sections to perform this week's experiment, Kirchoff's Laws.

Students in these sections will have one less experiment in their total score. They will be considered separately from sections with full set of labs and will have the same final grade distribution as in the other sections. Also, this experiment will not be one that is used for the practicals later in the semester.

A student wishing to do the experiment to enhance the material covered in the lecture course (score not recorded) should contact me by email ([bromberg@pa.msu.edu](mailto:bromberg@pa.msu.edu)) and I should be able find a place in an open section tomorrow, Thursday, Feb. 3.
