

MTP Bracket Front Surface

Material: hard aluminum "C" channel 0.125" thick

There is one square hole in the Front surface of the MTP Bracket. It is 0.560" by 1.160" and needs to have relatively square corners.

The right-hand edge of this hole is aligned with the inner surface of the "C" channel side wall.

Vertically center this hole.

The dotted "invisible" line is the Side wall of the "C" channel.
