X =
Extrusion Width
about 101 mm
Y = 110 mm

From the bar stock cut the heat sink blank
Y dimension to a length of 110 mm.

Machine 4 Mounting Holes into each heat sink.
Each of these holes consists of:

In a 11.5 mm diameter circle machine away the heat
sink fins and just touch the base plate to level it.

Drill a fairly tight hole through the
base plate for a 4-40 machine screw.

X,Y locations of these 4 Mounting Holes in mm:

15.5 , 80.5	85.5 , 80.5
15.5 , 29.5	85.5 , 29.5
