

Curriculum Vitae

Nathan De Lee

Personal Information:

Date/Place of Birth: November 2 1979, Rice Lake, WI, USA

Contact Information: Nathan De Lee

Department of Physics and Astronomy
Michigan State University
2171 Biomedical Physical Sciences
East Lansing, MI 48824-2320

Telephone: (517)-355-9200 ext. 2391

Fax: (517)-432-8802

Email: delee@pa.msu.edu

Web page: <http://www.pa.msu.edu/~delee>

Education:

Michigan State University 2002 - Present

Ph. D in Astronomy & Astrophysics

Ph. D Advisors: Horace Smith & Timothy Beers

Thesis: *RR Lyrae in the SDSS-II SN Survey*

Ph. D Expected: Summer 2008

Michigan State University 2006

M.S. in Astronomy & Astrophysics

M.S. Advisor: Horace Smith

Thesis: *The Strange Case of the Metal-Rich Cluster NGC 6304*

University of Kansas 1998 - 2002

B.S. in both Astronomy (with honors) and Physics

B.S. Advisors: Bruce Twarog & Barbara Anthony-Twarog

Thesis: *CCD uvbyCaH β Photometry of Clusters. III. The Most Metal-Rich Open Cluster, NGC 6253*

Research Interests:

- The internal processes of intrinsically variable stars and how that relates to their environment.
- Galactic formation history and the structure of the galactic halo.
- Dwarf spheroidal galaxies and their relationship to the formation history of the Local Group.
- Development of software for the detection and characterization of large numbers of variable stars for surveys.

Research Experience:

Observing:

- Michigan State University 24inch telescope 2002 - present
Purpose: Photometry of Type-II Cepheid lightcurves in globular clusters and RR Lyrae lightcurves in the g, r, and i.
- Kitt Peak YALO 0.9m with the S2KB imager Nov 2005; Mar, Apr, Oct 2007
Purpose: Stellar parameter determination using UBV and BVRI photometry.
- SOAR 4-m telescope with the OSIRIS infrared spectrograph Oct 2007
Purpose: Determining the oxygen abundance of carbon enhanced metal poor stars.
- Blanco 4-M telescope with the RC spectrograph Aug/Sept 2007
Purpose: Determination of Radial Velocities and Metallicities for halo SDSS RR Lyrae stars
- SOAR 4-m telescope with the SOAR Optical Imager Feb-Mar 2006; Mar, Apr, May, Jun 2007 *Purpose:* Photometric variable surveys of SDSS dwarf spheroidals and of globular clusters.
- CTIO 0.9m with the QUAD CCD May 2005
Purpose: Stellar parameter determination using UBV and BVRI photometry.
- Blanco 4-m telescope with the Mosaic imager Nov 2004
Purpose: Variable star survey of the Fornax Dwarf Spheroidal galaxy.

Software Design:

- Created the primary image transfer scripts for the SOAR telescope remote observing.
- Wrote one of the reduction pipelines for SOAR optical imager.
- Designed the instrument setup and night report web pages for SOAR.

Computer Expertise:

- **Languages:** C/C++, Perl, Fortran 77, PHP, MYSQL, and HTML.
- **Environments:** IRAF, IDL, Linux and Sun systems.

Teaching Experience:

- Dimensions summer camp, Astronomy section. June 2007
- ISP 205 Astronomy Lab 2003-2004

Professional Organizations:

American Astronomical Society

Awards:

- Graduate Student Research Enhancement Award 2006
- College of Natural Science Recruiting Fellowship 2002

Talks:

RR Lyrae stars: A look at variability in the SDSS-II Supernova Survey, Stellar Pulsation & Cycles of Discovery: New Tools, New Variables, New Astrophysics, University of British Columbia, Vancouver, Canada, July 2007

RR Lyrae Stars in the SDSS-II Supernova Stripe, MSU Variable Stars Meeting, East Lansing, MI March 2007

Variable Stars in NGC 6304, BGSU Variable Stars Meeting, Bowling Green, OH April 2004
