**Available Voltage Ratings for Bell & Gossett 60 Hertz Motors**

Table A notes standard voltage ratings for B&G sleeve bearing or ball bearing Booster Pump motors. These motors are designed to NEMA Standards and will operate satisfactorily at voltages plus or minus 10% of their rated voltage. If a Booster Pump is required with a voltage rating within 10% of the voltages listed below, the required HP motor with the respective standard voltage shown in Table A will be shipped. An M72152 Motor Voltage Tag regarding the plus or minus 10% variation will be attached to motor.
