

Inner Aluminum Preamp Box
17" x 18" Aluminum Plate

Additional holes in the Top and Bottom panels of the Inner Aluminum Preamp Box

Please add these new large and small holes to both the top and bottom aluminum panels.

This part is symmetric You may work on it from either the top or bottom surface of both panels.

∅ = 16 new holes are body drills for 10-24 screws.

The 2 new large holes should be about 3.300" in diameter to fit over the end of the 3" copper elbow.
