Notes:
The Preamp Box Power Connectors are Cinch-Jones S2404 rated for 15 Amps per contact.
All wiring up to the distribution fuses is 14 AWG.
All fuses are 2\(\frac{1}{4}\)Amp.
All wiring after the distribution fuses is 22 AWG.
The 6 pin connectors on the power drop cables to the PFC-16 cards are AMP MOD. IV with AMP part number 1-B7309-4 contacts rated for 3 Amps per contact.
Only 2 of the 16 power drop cables to the 15 PFC-16 cards are shown in this and in the Filter Fuse Panel drawings. There is one spare drop cable.
There are ferrite toroid common mode choke cores on the *14 input wires and on the *22 per card power drop cables that are not shown in this or in the Filter Fuse Panel drawings.
