

Key Visible Neon Lines

When neon gas is excited in a spectral tube, it produces distinct emission lines in the visible range:

- **540.1 nm** – green
- **585.2 nm, 588.2 nm** – yellow
- **603.0 nm, 607.4 nm, 616.4 nm** – orange
- **621.7 nm, 626.6 nm** – red-orange
- **633.4 nm, 638.3 nm, 640.2 nm, 650.6 nm, 659.9 nm** – red
- **692.9 nm, 703.2 nm** – deep red
