Title: 20 Years of Science with Chandra

Abstract:

Since 1999, NASA's Great Observatory the Chandra X-ray Observatory has provided pristine X-ray vision of the otherwise invisible high-energy Universe. Now in its 20th year of operation, Chandra continues to have great impact in the astrophysical community. I will give a broad overview of the scientific contributions enabled by Chandra - from objects in our own solar system to those at the farthest reaches of the Universe.
